## PROFILE

A dedicated high school student with 4 years of full-stack development experience, proficient in PHP, HTML, CSS, JavaScript, Python, and C++. Completed multiple projects. Certified in responsive web design and recognized in various web development competitions.

## RECENT PROJECTS & EXPERIENCE

- **Agriconnect (Ongoing)**  
CEO, Founder, Developer
  - Developed a comprehensive web application aimed at connecting farmers and consumers. The platform facilitates product listing, order management, and user communication, with a focus on enhancing local agriculture through technology.
- **StudyGuideEdu (Completed)**  
CEO, Founder, Developer
  - Building a web-based platform for students to access educational resources, share notes, and engage in community discussions. The project is designed to support remote learning and collaboration among students.
- **Rocket Computer System (Arduino)**  
CEO, Founder, Developer
  - Created a functional computer system using Arduino for a school rocket project. This involved programming in C++ and integrating various sensors and components to support the rocket's flight operations.
- **Personal Projects**
  - Developed and maintained various personal projects, including an e-commerce website and several automation scripts in Python. These projects showcase a diverse skill set and a commitment to continuous learning.
